

# High-pressure thermocouple Model TC90

WIKA data sheet TE 65.90

For further approvals,  
see page 10

## Applications

- Plastics manufacturing industry (LDPE/EVA)
- Hydrogen Refuelling Stations (HRS)
- Test benches for hydrogen systems
- Other compressed gases

## Special features

- Various process connections, metal seals
- Short response times
- High pressure containment without thermowell/protection tube
- Robust, vibration-resistant design
- Compact design with short insertion lengths for small nominal pipe widths

**High-pressure thermocouple, model TC90**  
Various process connections

## Description

This high-pressure thermocouple is used for temperature measurement in industrial applications. The thermocouple is suitable for the highest process requirements and enables reliable temperature measurement, for example, in plastics production and processing.

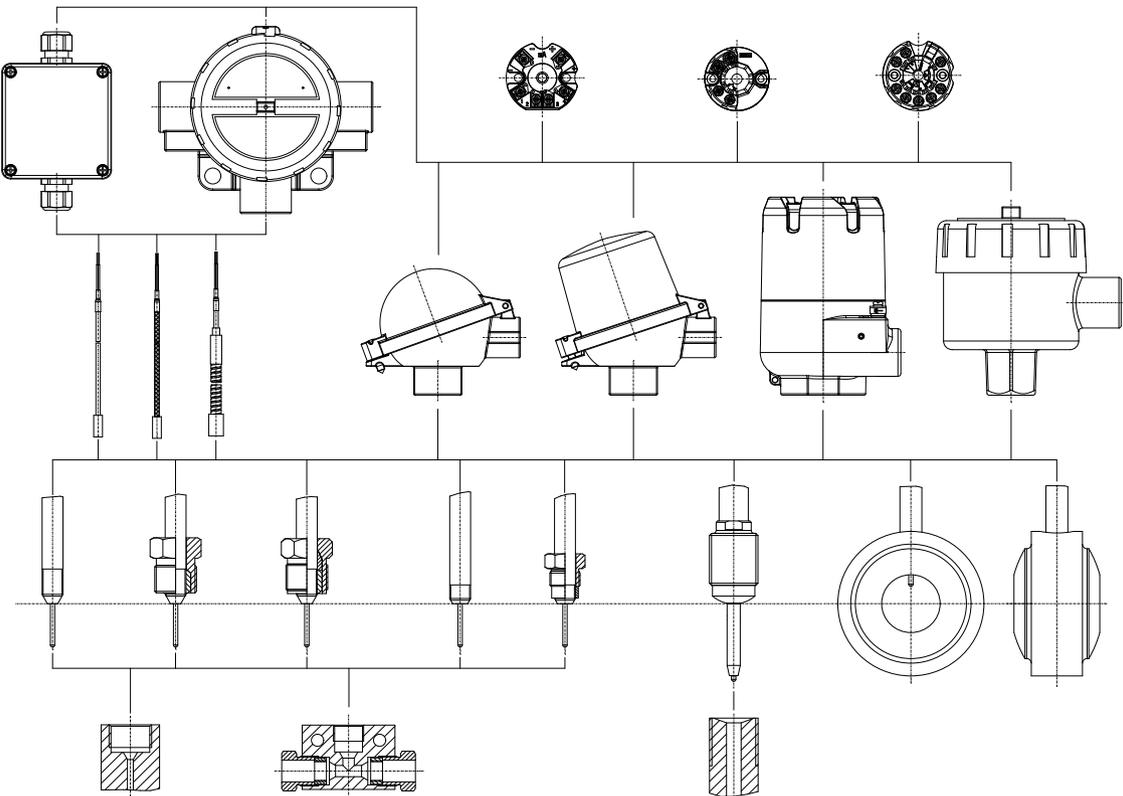

Each TC90 is designed and manufactured according to individual customer specifications. These instruments are manufactured using special manufacturing processes and, in order to ensure their quality, special test arrangements and material tests are applied.

This measuring assembly is sealed by means of metal-to-metal sealing, high-pressure threaded connectors or lens-type sealing rings, which have both proven successful over many years.

# Specifications

Overview of versions				
Version	Description	Process connection	Pressure range	Application
TC90-xxxx-A	Without pressure ring and male nut	Sealing bolt 58°	High pressure (max. 4,500 bar)	LDPE/EVA
	With pressure ring and male nut			
	With anti-vibration gland			
TC90-xxxx-B	Sealing bolts with radius and threads for flange	To customer specification		
TC90-xxxx-C	Lens-type sealing ring/Conical seal			
TC90-xxxx-H	Without pressure ring and male nut	Sealing bolt 58°	Medium pressure (max. 1,550 bar)	H2
	With pressure ring and male nut			Hydraulics
TC90-xxxx-S	Without pressure ring and male nut			
	With pressure ring and male nut

## Sensors

Although the thermocouple types used (K, J, E, T, N) have a much higher temperature range, the maximum working temperature for high-pressure measurements is limited through the process to 350 °C [662 °F]. For all characteristic values of the thermocouples, see technical information IN 00.23.

#### Functional safety version possible with model T38 temperature transmitter

In safety-critical applications, the entire measuring chain must be taken into consideration in terms of the safety parameters. The SIL classification allows the assessment of the risk reduction achieved by the safety installations.

Selected TC90 thermocouples, in combination with a suitable temperature transmitter (e.g. model T38, TÜV-certified SIL version for protection systems developed in accordance with IEC 61508), are suitable as sensors for safety functions to SIL 2.

For SIL 3 applications, WIKA recommends the use of two individual TC90 with one SIL-certified T38 transmitter connected to each.

→ Functional safety: safety-relevant temperature measurement per IEC 61508 available at [www.wika.de](http://www.wika.de).

3) Not available for ½ NPT thread size cable entry  
4) With appropriate mating connector connected  
5) Suitable cable gland required for operation

## Lead ends

Version	Illustration	
End splices		<p>With end splices</p> <p>Cable and probe are permanently connected to each other. Cable length and insulation materials to customer specification. Number of leads dependent on the number of sensors and the sensor connection method, bare wire ends</p>

## Bend protection

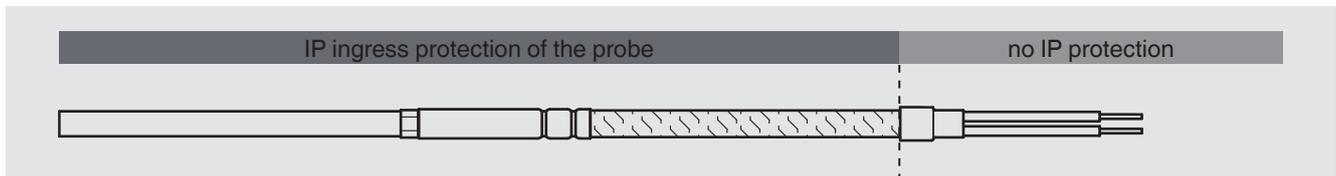

A bend protection (spring) is used to protect the transition point from rigid probe to flexible connection lead. This should always be used when a relative movement between the connection lead and the thermometer mounting is expected. For designs to Ex e, the use of bend protection is mandatory.

Bend protection spring

Operating conditions		
Process temperature	Sheath material Ni alloy: alloy 600	To 1,200 °C [2,192 °F] (air)
	Sheath material stainless steel	To 850 °C [1,562 °F] (air)
Storage temperature range	■ -40 ... +80 °C [-40 ... +176 °F]	
	■ -60 °C [-76 °F]	
	→ Others on request	

## IP ingress protection per IEC/EN 60529

First index number	Degree of protection / Short description	Test parameters
<b>Degrees of protection against solid foreign bodies (defined by the 1st index number)</b>		
5	Dust-protected	Per IEC/EN 60529
6	Dust-tight	Per IEC/EN 60529
<b>Degrees of protection against water (defined by the 2nd index number)</b>		
4	Protected against splash water	Per IEC/EN 60529
5	Protected against water jets	Per IEC/EN 60529
6	Protected against strong water jets	Per IEC/EN 60529
7 <sup>1)</sup>	Protected against the effects of temporary immersion in water	Per IEC/EN 60529
8 <sup>1)</sup>	Protected against the effects of permanent immersion in water	As agreed upon

1) Ingress protections, describing temporary or permanent immersion, on request.

Standard ingress protection of the model TC90 is IP65.

The specified degrees of protection apply under the following conditions:

- Use of a suitable cable gland
- Use of a cable cross-section appropriate for the gland or select the appropriate cable gland for the available cable
- Adhere to the tightening torques for all threaded connections

- 1) Only for connection head model BSZ, BSZ-H, 1/4000, 5/6000 or 7/8000 (see "Connection head")
- 2) Only with connection head, model 1/4000, 5/6000 or 7/8000 (see "Connection head")
- 3) Only without transmitter
- 4) Only with transmitter

## Manufacturer's information and certificates

Logo	Description
	<b>SIL 2</b> Functional safety
-	<b>China RoHS directive</b>

## Test report

Test report	
Pressure test	Each model TC90 high-pressure thermocouple is subjected to 1.5 x PN or a hydrostatic pressure test to customer specification, with test pressures to a max. 5,400 bar (78,320 psi). Furthermore, for example, liquid penetrant inspection of surfaces or X-ray testing of components are possible in accordance with national or international standards (performance, evaluation).

## Certificates

Certificates	
<b>Certificates</b>	<ul style="list-style-type: none"> <li>■ 2.2 test report per EN 10204 (e.g. state-of-the-art manufacturing, material proof, indication accuracy)</li> <li>■ 3.1 inspection certificate per EN 10204 (e.g. material proof for wetted metal parts, indication accuracy, calibration certificate)</li> </ul>
<b>Calibration</b>	DAkKS calibration certificate (traceable and accredited in accordance with ISO/IEC 17025), depending on the selected design and probe size
<b>Recommended calibration interval</b>	1 year (dependent on conditions of use)

## Dimensions

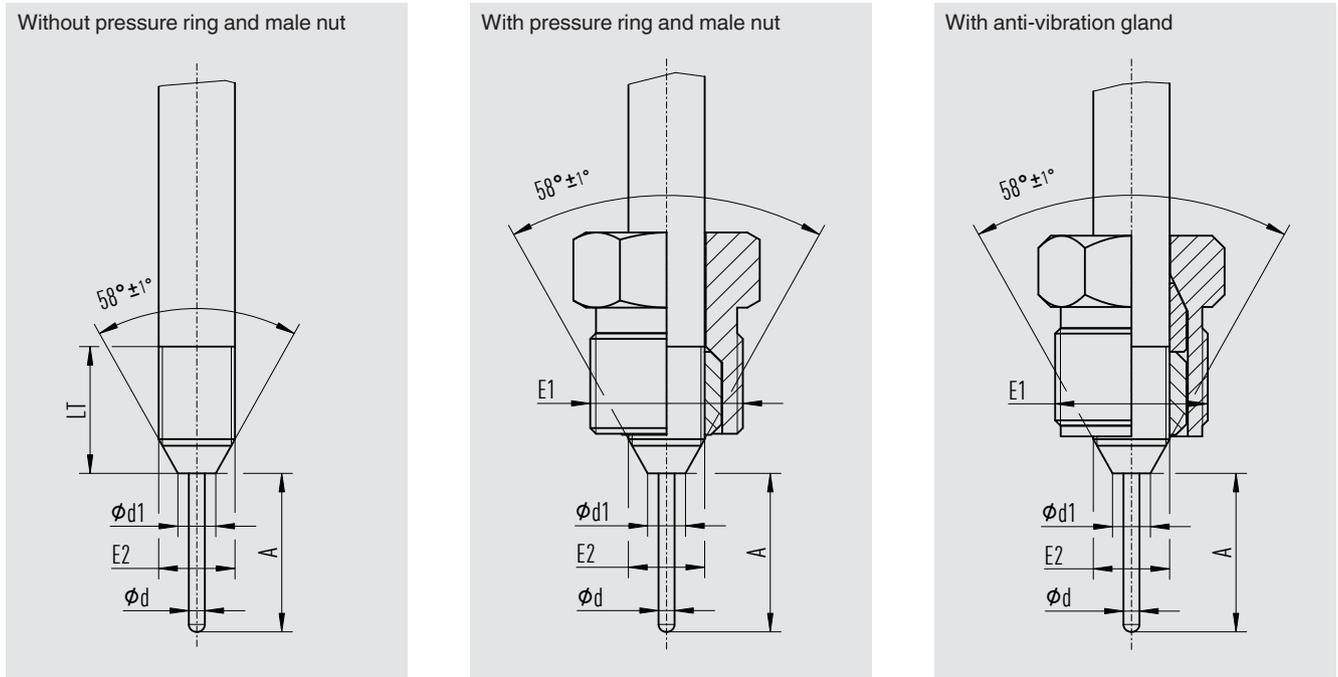

Each TC90 high-pressure thermocouple is designed and manufactured in accordance with individual customer specifications. The specifications contained in the tables are not binding and only constitute examples.

The responsibility for the tolerance and durability of the materials with the medium lies with the operator.

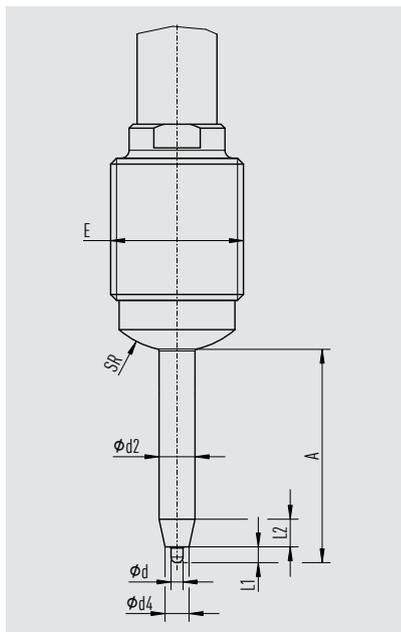

### Legend

E	Pressure flange thread	∅ d2	Support tube diameter	LT	Length of sealing bolt thread
E1	Male nut thread	∅ d3	Outer diameter	L1	Thermocouple length
E2	Pressure ring thread	∅ d4	Cone diameter	L2	Cone length
SR	Lens-type sealing ring radius	∅ d5	Lens-type sealing ring diameter	W	Cable length
∅ d	Thermocouple diameter	∅ d6	Inner diameter	L	Length of the stranded wire
∅ d1	Sealing cone tip diameter	A	Insertion length		

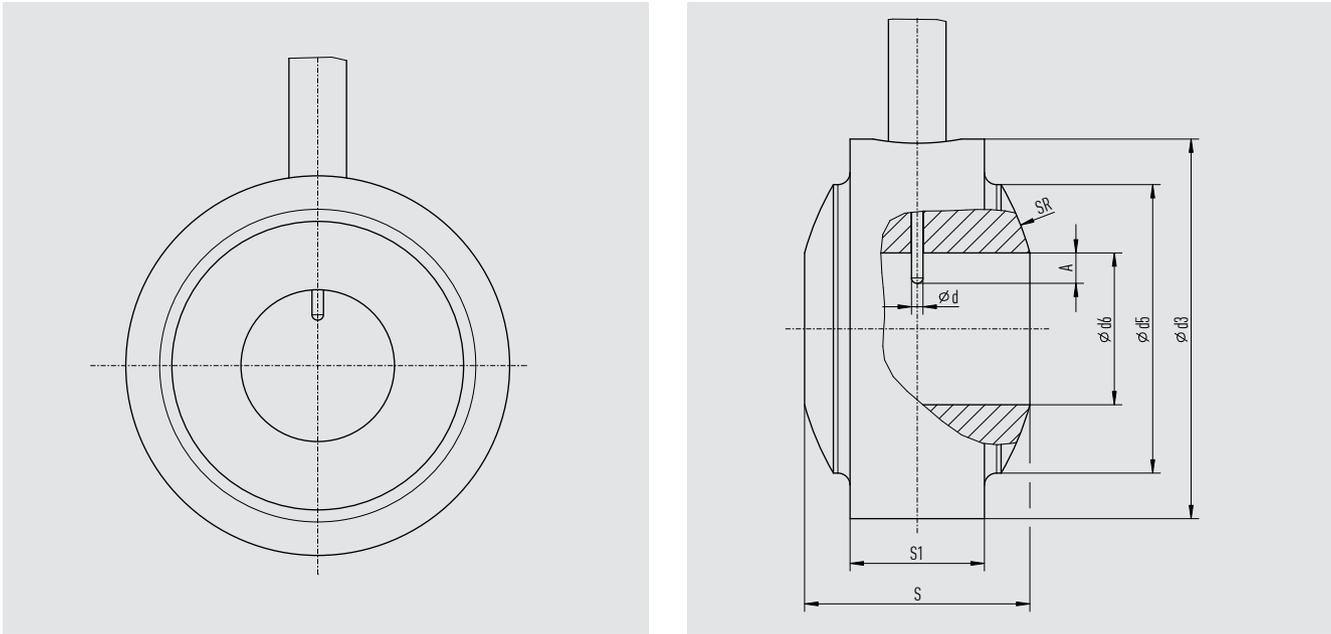

### Version TC90-xxxx-A, high-pressure thermocouple with long threads, up to 4,500 bar [66,268 psi]

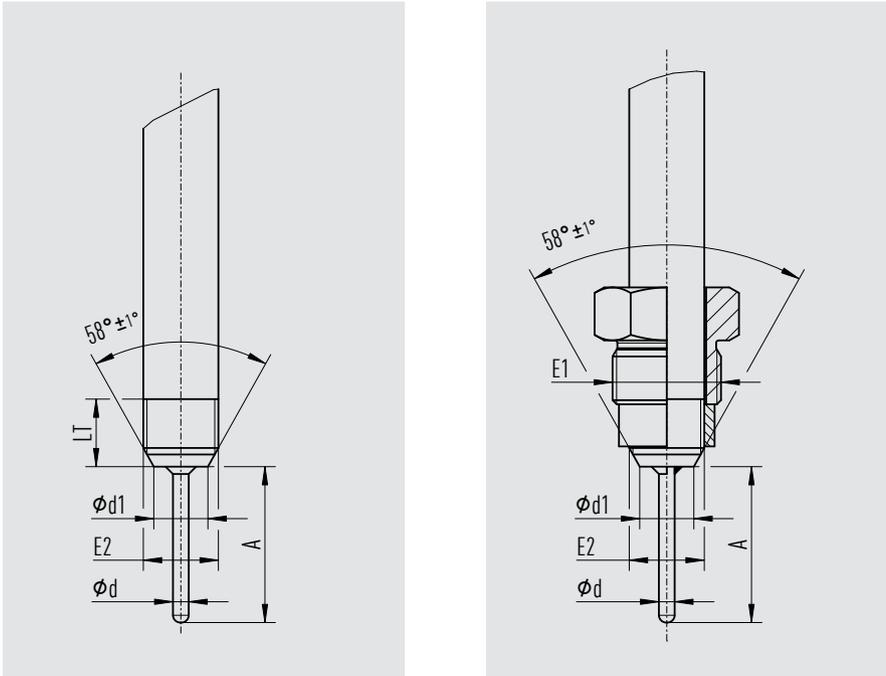

### Version TC90-xxxx-B, high-pressure thermocouple for pressure flanges up to 4,500 bar [66,268 psi]

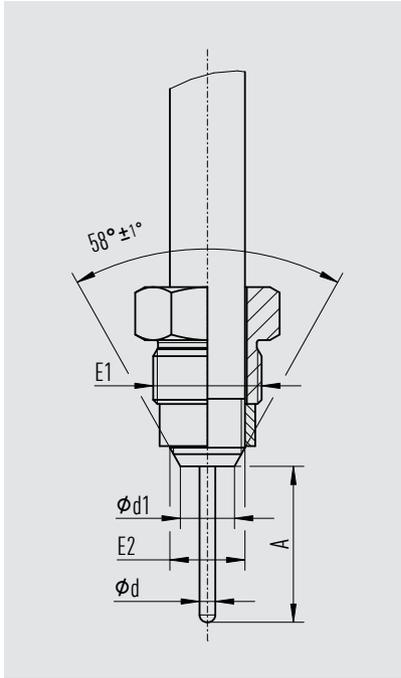

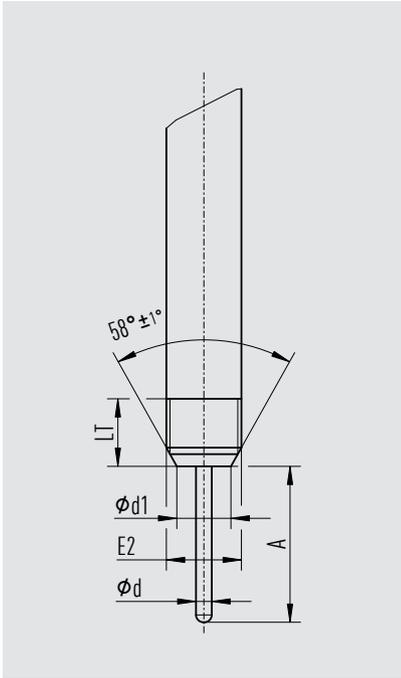

**Version TC90-xxxx-C, high-pressure thermocouple with lens-type sealing ring or sealing cone up to 4,500 bar [66,268 psi]**

**Version TC90-xxxx-H, medium-pressure thermocouple with short threads up to 1,550 bar [22,481 psi] (hydrogen version)**

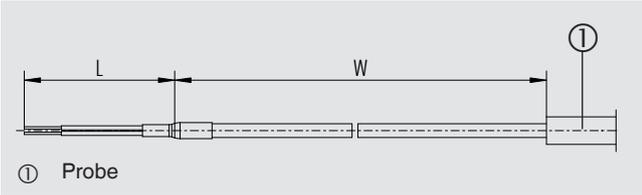

Version TC90-xxxx-S, medium-pressure thermocouple with short threads up to 1,550 bar [22,481 psi]

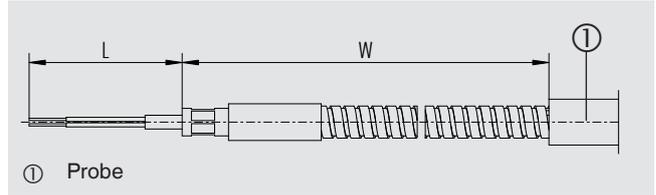

With connection cable

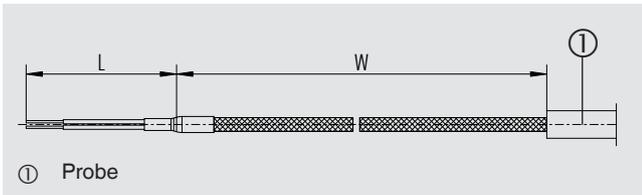

Standard version

Connection cable with protective metal armoring

Connection cable with stainless steel braid

### Ordering information

Model / Version / Connection cable / Nominal pressure / Medium temperature / Number of thermocouples / Class accuracy / Hot junction / Neck tube / Transition sleeve / Connection cable / Jacket / Cable version / Lead end / Shielding / Process connection / Material / Male nut / Sealing contour / Male nut / Support tube / Sensor diameter / Sheath material / Neck length / Insertion length / Cable length / Stranded wire length / Options

To order the described product the order number is sufficient.
